

In the Claims

Please cancel Claims 1-14.

Add the following new claims:

15. (New): A process for manufacturing of a solution of a dialkyl peroxydicarbonate in which alkyl radicals thereof contain 2 or 3 carbon atoms, comprising
reacting, in water, alkyl haloformate, in which the alkyl radicals thereof contain 2 or 3 carbon atoms, with an inorganic peroxide to form the dialkyl peroxydicarbonate in an aqueous reaction mixture,
adding an inorganic salt to the aqueous reaction mixture to increase the density of the aqueous reaction mixture; and
extracting the formed dialkyl peroxydicarbonate with a water-insoluble solvent to produce the solution of dialkyl peroxydicarbonate, wherein the water-insoluble solvent is a plasticizer for polyvinyl chloride.
16. (New): The process according to claim 15 wherein the water-insoluble solvent is selected from a group consisting of esters of aromatic polycarboxylic acids, alkyl epoxycarboxylates, epoxidized oils and dialkyl alkanedicarboxylates.
17. (New): The process according to claim 15, wherein the increased density has a value of at least 1.05.
18. (New): The process according to claim 15, wherein the inorganic salt is sodium chloride.
19. (New): The process according to claim 15, wherein the dialkyl peroxydicarbonate is diethyl peroxydicarbonate or diisopropyl peroxydicarbonate.
20. (New): The process according to claim 15 wherein the alkyl haloformate is a chloroformate.

21. (New): The process according to claim 15 wherein the inorganic peroxide is hydrogen peroxide in the presence of sodium hydroxide or sodium peroxide.

22. (New): The process according to claim 21 wherein the inorganic peroxide is hydrogen peroxide in the presence of sodium hydroxide.

23. (New): A process for the manufacture of a solution of a dialkyl peroxydicarbonate in which the alkyl radicals thereof contain 2 or 3 carbon atoms, comprising reacting, in water, alkyl haloformate, in which the alkyl radicals thereof contain 2 or 3 carbon atoms, with an inorganic peroxide to form the dialkyl peroxydicarbonate in an aqueous reaction mixture,

adding an inorganic salt to the aqueous reaction mixture to increase the density of the aqueous reaction mixture; and

extracting the formed dialkyl peroxydicarbonate with a dialkyl alkanedicarboxylate derived from a C₄-C₁₀ alkanedicarboxylic acid and a C₂-C₁₂ alkanol, to produce the solution of dialkyl peroxydicarbonate.

24. (New): The process according to claim 23, wherein the dialkyl alkanedicarboxylate is derived from a C₄-C₈ alkanedicarboxylic acid and a C₆-C₁₀ alkanol.

25. (New): The process according to claim 24, wherein the dialkyl alkanedicarboxylate is a dialkyl hexanedicarboxylate (adipate) derived from adipic acid and a C₆-C₁₀ alkanol.

26. (New): The process according to claim 25, wherein the dialkyl hexanedicarboxylate is diethylhexyl adipate.

27. (New): The process according to claim 23, wherein the increased density has a value of at least 1.05.

28. (New): The process according to claim 23, wherein the inorganic salt is sodium chloride.

29. (New): The process according to claim 23, wherein the dialkyl peroxydicarbonate is diethyl peroxydicarbonate.

30. (New): The process according to claim 23 wherein the alkyl haloformate is a chloroformate.

31. (New): The process according to claim 23 wherein the inorganic peroxide is hydrogen peroxide in the presence of sodium hydroxide or sodium peroxide.

32. (New): The process according to claim 31 wherein the inorganic peroxide is hydrogen peroxide in the presence of sodium hydroxide.

33. (New): A process for the manufacture of a solution of diethyl peroxydicarbonate, comprising

reacting, in water, ethyl haloformate with an inorganic peroxide to form diethyl peroxydicarbonate in an aqueous reaction mixture,

adding an inorganic salt to the aqueous reaction mixture to increase the density of the aqueous reaction mixture; and

extracting the formed diethyl peroxydicarbonate with a water-insoluble solvent to produce the solution of diethyl peroxydicarbonate, wherein the water-insoluble solvent is a plasticizer for polyvinyl chloride.
